CSS, Material UI, Element Plus, Tailwind css, Bootstrap

### API Intergration/Authentication

RestfulAPI / oAuth

## WORK EXPERIENCE

### Ownage Fiditech — Front-end developer

JUNE 2023- APRIL 2024

**React.js, Vue.js, HTML, CSS, Javascript, TypeScript, Docker, Sitemap, Seo**

- Achieved a **90% code reuse rate** by developing reusable code and libraries, accompanied by comprehensive documentation, resulting in increased efficiency and reduced development time for subsequent projects.
- Achieved a **30% improvement in mobile page load times** by implementing responsive design principles, image compression techniques, and server-side optimizations tailored for mobile networks. This effort ensured a seamless experience for users accessing the platform on smartphones and tablets, addressing the growing importance of mobile devices in our user base.

### Wetech - Front-end developer (Contract)

February 2023 - May 2023

**React.js, HTML, CSS, Javascript, Material UI**

- Collaborated effectively with backend developers, contributing to 50% faster troubleshooting and debugging processes, leading to quicker deployment of stable, reliable software solutions.
- Maintained version control using Git, achieving 100% code consistency and reusability, facilitating smooth team collaboration and scalable development practices.

### Sirinu Token - Front-end developer (Contract)

Sept 2022 - Dec 2022

**React.js, HTML, CSS, Javascript, Material UI**

- Achieved a 25% reduction in page load times by meticulously optimizing critical rendering paths, resource loading, and server-side processing, significantly enhancing content delivery speed to users.
